

What is playful, versatile and yet still clearly arranged? Exactly, now! vision. It betrays a clear line yet is still extremely flexible: the surfaces vary from classical lacquer and high-gloss lacquer fronts to accent versions in stylish petrol, teal blue and terracotta as well as high-quality veneers in core walnut and natural oak. Push-to-open technology allows you to open closed units without the need for handles – resulting in a very pure visual effect. And you cannot only play around with the colours, the large selection of available units means that you can plan stacked or wall units variably within the limits of the bookshelf frame system. Suitable designs for the living room, dining room and study make now! vision a futuristic all-rounder.

Planning notes

Lists of versions

Carcase versions

Price group I
White lacquer
Grey lacquer
Black lacquer

Accent versions

Price group II

Open units

Carcase in carcase versions

Partitions, fitted shelves and rear wall in carcase versions, in accent versions in natural oak or core walnut

Rear wall with partition

Rear wall with partition in carcase versions, in accent versions, in natural oak or core walnut

Angled shelves

Wall panel of angled shelves in carcase versions, in accent versions, in natural oak or core walnut; shelf in carcase versions

Changing versions:

In now! vision colour combinations within individual units are possible. In this case please state the versions clearly and separately in the order! If versions from different price groups are exchanged, the higher price group is always charged. **Please state all the versions clearly in the order!**

Example:

Carcase in black lacquer

Door, top drawer and bottom flap in white lacquer

Middle drawer in core walnut

- **hülsta-Push-to-open:** All drawers, hinge-doors and flaps with hülsta-Push-to-open

- Since 1996, we are entitled to label all of our modular furniture and base frames with the strictly regulated "Blue Angel", which awards products that are low in emissions and especially environmentally friendly.

Please be sure to see the „now! general“ chapter on the following subjects:

- Important notes on including lighting
- Remote control set for LED lamps
- IR repeater set for lowboards
- Flatscreen TV sizes overview
- Flap hinge
- Wall units
- Maximum loads
- Quality of walls / assembly instructions

Planning lowboards / sideboards

Planning step 1

Choice of type

Please note:
Please state all the versions clearly in the order (see here the information on the previous page).

Planning step 2

Choice of optional legs/optional substructure

Please note:
Cannot be fitted with sideboards with flush-front sliding-doors

Planning step 3

Choice of optional accessories such as:

- Fitted shelf for sideboard
- LED-light strip for sideboard with flush-front sliding-doors
- Glass bonnet for lowboards

Planning step 4

Choice of optional glass cover shelf in the required version

Planning assembly units

Planning step 1

Choice of unit

Please note:
Please state all the versions clearly in the order (see here the information on the previous page). A wall bracket is necessary for fitting as a wall unit (possible up to max. 8R height).

Planning step 2

Choice of optional accessories such as:

- Fitted shelf
- Fitted glass shelf
- LED light strip
- LED glass rim lamp
- Glass cover shelf

Stacking assembly units (possible up to 12R total height)

With now! vision it is possible to stack assembly units up to a maximum height of 12R. In this case a wall bracket must be ordered for each stacked unit.

Planning the bookshelf frame system

Planning step 1

Choice of bookshelf frames in the required number and version

Please note: 2 outer bookshelf frames must be included in every bookshelf frame combination. As many centre bookshelf frames can be included as required.

Planning step 2

Choice of fitted shelves, rear walls with partition and assembly units in the required number and version

Please note: A rear wall with partition can only be fitted in combination with assembly units and/or fitted shelves. If assembly units are fitted between bookshelf frames, a fitted shelf is essential at the bottom of the lowest assembly unit. If assembly units up to 4 Raster height are fitted, a wall bracket must be ordered. The same applies to every other fitted assembly unit. For constructional reasons at least 2 fitted shelves must be included, for 12 Raster bookshelf frames a third shelf must be included. 6 Raster bookshelf frames may only be stacked to a maximum 4 Raster height, 8 Raster bookshelf frames may only be stacked to a maximum 6 Raster height and 12 Raster bookshelf frames may only be stacked to a maximum 8 Raster height.

Planning step 3

Choice of optional spacer bars in the required number and version

Special combinations

Special combinations are arrangements that are reduced in price. This price advantage is only available when the arrangement is ordered exactly as described. The special combinations can be enhanced by including accessories. These are charged extra. If versions from different price groups are exchanged, the higher price group is always charged. **Please state all the versions clearly in the order!**

Sketch raster for the
now! vision range

Type list

Please superimpose unlined paper and write firmly. In order to avoid slipping, use two paper clips or fold the edge of the drawing sheet.

Checklist

- 1.) Do the **sketch** and the **order** match? Do the **dimensions** and the **sketch** match the type number? Are all **type numbers** correctly stated in the sketch? Can one see the position of **door hinges**?
- 2.) Are all **type numbers** correct? Have you perhaps confused **price** and **type numbers**?
- 3.) In combinations of **wooden, lacquer and high-gloss lacquer versions**: is it clear which units are to be delivered in which version?
- 4.) Is it clear whether the types ordered are to be employed as **wall units** or as **plinth units**? Have you remembered the **wall bracket** for wall units?
- 5.) For the **bookshelf frame system**: If assembly units are fitted between bookshelf frames, a fitted shelf is essential at the bottom of the lowest assembly unit. For constructional reasons at least 2 fitted shelves must be included, for 12 Raster bookshelf frames a third shelf must be included.
- 6.) Are all **accessories** such as lamps etc. included in the sketch?
- 7.) Is this an **additional order**? If so, when was the **original order**? If possible, include a sketch on which the existing and new units are clearly marked.

Please also remember the planning notes on the introductory pages!

Note on calculating widths for bookshelf frame combinations:

The width table states all widths up to 352.1 cm (greater widths always in steps of 35.3 cm). This width results from the shelf widths. To determine the total width, 1.5 cm must be added for each bookshelf frame!

			35.3	70.5	105.7	140.9	176.1	211.3	246.5	281.7	316.9	352.1
